📞 (0307) 411-5755 ✉ alihassanaslam2000@gmail.com 🔗 [linkedin.com/in/ali-hassan-799468306](https://www.linkedin.com/in/ali-hassan-799468306)

Technical Skills

Languages and Databases: C#, C++, SQL Server, MongoDB

Web Development: ASP.NET Core MVC, ASP.NET Core Web API, Blazor, HTML, CSS, JavaScript

Cloud & Architecture: Microservices, Azure Bus Service, API Gateway, Azure CI/CD Pipeline, RabbitMQ **Version**

Control: GitHub (branching, merging, pull requests)

Tools: Microsoft SQL Server Management Studio (SSMS), MongoDB Compass, Visual Studio, Postman **Design**

Patterns: Dependency Injection, N-Tier Architecture, Repository Pattern

Experience/Projects

Inovedia Technologies

May 12, 2024 – Present

Junior .NET Developer (Backend Software Engineer)

Lahore, Pakistan

- Working on backend **API development** for **eSIM provisioning, activation, and management** using **ASP.NET Core Web API**.
- **Consuming RESTful APIs** to integrate eSIM services with external platforms, ensuring smooth communication and data flow.
- Contributed to frontend development using **ASP.NET Core MVC, HTML, CSS, and JavaScript**, delivering **responsive and user-friendly** interfaces for eSIM management.
- Applied **MVC** and **N-Tier** architecture principles to maintain a **clean, scalable, and maintainable** codebase.
- Managed and optimized **SQL Server** databases for efficient eSIM data **storage and retrieval**.
- Collaborated in **Agile sprints** with **cross-functional teams** to deliver API and frontend features efficiently.
- Enhanced customer experience by enabling **instant digital SIM activation**, eliminating the need for **physical SIM cards**, reducing purchase time from **days to minutes**, and making it easier for **travellers and remote users** to get connected anytime, anywhere.

September 1, 2024 – April 10, 2024

Junior .NET Developer (Backend Software Engineer)

Lahore, Pakistan

Automated Requirement and Collaboration (ARC)

- **Designed Scalable Architecture:** Engineered modular, scalable, and high-performance backend solutions, including role management, payment gateways, customer creation, questionnaires, claims, and partner management, reducing documentation and development time from **3 days to less than 4 hours**
- **Automated Documentation Workflows:** Developed a data-driven template system to automate Word document generation, significantly reducing manual effort and improving operational efficiency
- **Advanced Security Implementation:** Implemented **role- and claim-based access control**, ensuring a **robust and secure authorization framework** tailored to business needs.
- **Optimized Database Performance:** **Designed and optimized** SQL Server-based data storage and retrieval mechanisms, **enabling** efficient handling of large datasets **while** boosting query performance.
- **Technology Stack Excellence:** Built the application using **ASP.NET Core MVC, Identity Framework, Entity Framework Core, and an N-tier architecture**, following best industry practices for scalability, maintainability, and security.
- **Seamless API Integration:** **Integrated RESTful APIs** for third-party services, **ensuring** smooth data exchange, enhanced interoperability, and system efficiency.

June 2, 2024 – August 2, 2024

Lahore, Pakistan

.NET Developer Intern (Backend Software Engineer)

- Assisted in the development of web applications using **C#, ASP.NET Core, and RESTful APIs**.
- Contributed to the backend development of the **VCMS Campaign Management System**, leveraging the **MVC architecture** in .NET Core.
- Managed and optimized **SQL Server databases** using **SSMS**, ensuring efficient data handling and retrieval.
- Gained practical experience in **microservices architecture** and **cloud integration** with **Microsoft Azure**.
- Worked closely with senior developers to enhance **query performance** and optimize **backend operations**.
- Assisted in **CI/CD pipeline management**, supporting deployment processes and bug fixes.
- Engaged in **Agile methodologies**, actively participating in **sprint planning, daily stand-ups, and team collaboration**.

Personal Projects/Awards & Achievements

Food Website

Developed an interactive, responsive food ordering site using HTML, CSS, and JavaScript, focusing on user experience optimization.

Racing Game (Final Year Project)

Led the development of an immersive racing game using C#, Unity, and Blender, designing gameplay mechanics, 3D environments, and characters while demonstrating creativity, collaboration, and problem-solving skills.

Education

2019 - 2023

BSCS / University of Lahore

2017 - 2019

Intermediate (Pre-Engineering) / Govt. Islamia College, Civil Lines, Lahore

2015 - 2017

Matriculation (Science) / Govt. Islamia High School, Lahore
